

Associate in Veterinary Technician

A certificate is the lowest level of all degree types, and is most commonly achieved as a means of career preparation. Certificates are often granted for very concentrated areas of study.

Veterinary technology associate's degree programs prepare animal lovers to work alongside veterinarians as veterinary technicians, commonly referred to as veterinary techs. The Associate of Applied Science (AAS) in Veterinary Technology typically consists of classroom learning and hands-on training experiences through internships. Students should ensure that they attend a program that is accredited by the American Veterinary Medical Association (www.avma.org). To qualify for employment in animal healthcare, graduates must sit for the National Veterinary Technician (NVT) examination or other state-mandated licensing examination. A veterinary tech holding an associate's degree might work for a private veterinary office, veterinary hospital, clinic or even a zoo.

Schools That Offer Associate in Accounting

Building on Purdue's mission to provide greater access to affordable, world-class education, Purdue University Global delivers a highly personalized online experience tailored for working adults. By opening the doors to adults who need flexibility to fit learning into their busy lives, we make it possible to achieve a high-quality education from the prestigious Purdue University system—from anywhere in the world.
